

JustFood ERP Cloud

Modernize your business with enhanced security, integrated data and mobility exclusively for food companies

The JustFood ERP Cloud provides a complete solution built specifically for food manufacturers and food distributors, and backed by the security, flexibility, and scalability of a SaaS model. We deliver the capabilities you need without the challenges of a traditional on-premise deployment.

Reduced Costs

Remove the high cost of hardware and labor that come from running your own data center, and avoid unplanned expenses with defined, predictable costs

Access Anywhere

Provide your users with greater flexibility by enabling them to access JustFood securely, wherever they have an internet connection

High Availability

Always on, always available - JustFood's SLA guarantees 99.9% uptime via the Microsoft Azure platform

Increased Security

JustFood is accessible through our secure and monitored online environment for maximum protection against a breach of your data

Disaster Protection

Your data is backed up, and always available even if your facilities suffer from a natural disaster, hardware failure, or other unfortunate event

Support Growth

Our scalable model allows you to dynamically add computing power and capacity as you grow, instead of paying now for your future needs

Robust, Secure Hosting for your JustFood Infrastructure

Powered by Microsoft Azure, JustFood Cloud delivers the rich features you need in a secure environment that is trusted by 95% of the Fortune 500. All of the information and insights you require are delivered through a complete and compelling user experience allowing you to focus on managing and growing your business.

Key Features & Benefits

- **A Trusted Platform** - Microsoft Azure features embedded security across the broadest global footprint and the largest compliance portfolio, with enterprise-grade SLAs, and industry-leading support. Aptean leverages segmentation and volume encryption to provide you with the highest degree of data security, as well as reliability and flexibility.
- **Minimize On-Premise Hardware** - A move to the Cloud means fewer costly hardware purchases and upgrades, along with the license costs for database and operating systems. You'll also avoid the high cost of in-house technical expertise to maintain that hardware.
- **Downtime Loss Avoidance** - When on-premise systems are down it's not just hardware that's not running, it's the whole company. A 99.9% uptime guarantee insures against potentially huge losses including wages and salaries, production downtime, reduced customer service levels, and more.
- **Managed Tech Services** - Experienced Microsoft and JustFood experts handle upgrades, health checks, and code deployments to take the burden off your internal IT infrastructure, saving you time, money, and resources while reducing risks.
- **Performance Optimization** - Your system is kept finely tuned for speed and performance so that it can scale without interruption. You benefit from maximized productivity, even as your database and usage grow.

JustFood is enterprise management software designed exclusively for food companies. From the moment materials and ingredients enter your facilities, until the finished product is delivered, JustFood is there, helping manage every aspect of your business. JustFood connects departments, data, and processes, giving you the insight, visibility, and control needed to take your business to the next level.

Make your move to the Cloud today and step up to the most secure and profitable way to run your business. For more information on the JustFood Cloud, contact your account manager or email info@justfood.com.

JustFood is an Aptean company. Aptean is a global provider of mission-critical, industry-specific software solutions.
